Risk Assessment and Mitigation Plan

Instructions:

Step 1: Brainstorm possible risks.
Step 2: For each risk, assign a High/Medium/Low value for both potential impact and probability of occurrence on the project.
Step 3: Develop a mitigation plan for each High/High, High/Medium and Medium/High risk.
Consider developing mitigation plans for the Medium/Medium risks.

Risk	Potential Impact on Project Success (*Low/Medium/High*)	Probability of Occurrence (*Low/Medium/High*)	Mitigation Plan (*For all H/H, H/M and M/H risks. Recommended for M/M risks.)*
