BUILDING HEALTHY COMMUNITIES

4th Annual CCTS Scientific Meeting
and 5th Annual Appalachian Health Summit

Monday, May 6, 2013 | 7:00am - 4:30pm | Nationwide & Ohio Farm Bureau 4-H Center
Dear Investigators,

It is my pleasure to welcome you to The Ohio State University Center for Clinical and Translational Science’s (CCTS) Fourth Annual Scientific Meeting focusing on Building Healthy Communities. This year, in partnership with Ohio University and the Appalachian Translational Research Network (ATRN), our meeting consists of two integrated and complementary tracks: the Fifth Annual Appalachian Health Summit: Tobacco Use, Prescription Misuse & Other Addictions, which will highlight the scientific advances in addiction research that are beginning to be translated to improve the health of Appalachia, and the CCTS Scientific Meeting: The Power of Community Engaged Research, which will build upon the scientific theme to provide conference attendees with innovative tools and methods to facilitate working in interdisciplinary teams with sustained community engagement to identify and set priorities and design and implement interventions to address the most relevant complex health problems in communities. We invite you to attend sessions across the two tracks that meet your scientific interests and engage our panelists and poster presenters in scientific discourse. This promises to be an exciting and provocative day.

The CCTS seeks to share and extend our culture of collaboration and innovation as we build an accessible clinical and translational infrastructure to support the translation of scientific discovery from the bench to bedside to the community. In partnership with The Ohio State University Wexner Medical Center, Nationwide Children’s Hospital, seven Ohio State Health Sciences colleges (Dentistry, Medicine, Nursing, Optometry, Pharmacy, Public Health and Veterinary Medicine) and five non-Health Sciences colleges on the Ohio State campus (Arts & Sciences, Engineering, Food, Agriculture and Environmental Sciences, Fisher College of Business), we are excited to stand at the crossroads where lifestyle, behaviors, pharmacology, genetics, biochemistry, community and social sciences intersect with research investigators. We recognize that the translation of scientific advances requires the efforts of scientific teams that represent a range of expertise to tackle these problems from promising new scientists and highly distinguished faculty scholars who perform groundbreaking clinical and translational research to our exemplary clinicians who bring these scientific advances to the bedside, changing the face of healthcare delivery. Through the presentations, panel discussions and networking opportunities at this conference, we will also challenge you to actively integrate stakeholders — community members, patients and their families, healthcare providers and those who make public policy — as part of multidisciplinary scientific teams so that we can truly realize the promise of translational science to generate knowledge that is applied to improve health.

We are honored to be a member of the CTSA Consortium within the National Center for Advancing Translational Sciences (NCATS) at the National Institutes of Health (NIH). We are committed to strengthening our relationship with you, the translational scientific community at Ohio State, as well as with our Ohio State CCTS partners such as the Appalachian Translational Research Network institutions University of Kentucky, University of Cincinnati, West Virginia University, Ohio University and Marshall University, other CTSA institutions and the NIH, as we rededicate ourselves to our mission of advancing translational sciences. We hope you will continue to visit our website (ccts.osu.edu) to stay apprised of our ever-growing research opportunities and progress.

Sincerely,

Rebecca D. Jackson, MD
Director, The Ohio State University Center for Clinical and Translational Science
Associate Dean for Clinical Research, The Ohio State University College of Medicine

The 4th Annual Scientific Meeting theme is The Power of Community Engaged Research
The 5th Annual Appalachian Health Summit theme is Tobacco Use, Prescription Misuse & Other Addictions.

AGENDA

7:00-8:00 am ■ A.B. Graham Hall 1st Floor
Registration and Continental Breakfast

8:00-8:05 am ■ Bob Evans Memorial Auditorium (145 and 155)
Welcome, CCTS Opening Remarks
Rebecca D. Jackson, MD, Director, Ohio State’s Center for Clinical and Translational Science

8:05-8:10 am ■ Bob Evans Memorial Auditorium (145 and 155)
ATRN Opening Remarks
Jane Hamel-Lambert, PhD, MBA

8:10-8:15 am ■ Bob Evans Memorial Auditorium (145 and 155)
Introduction of Keynote Speaker
Laureen Smith, PhD, RN

8:15-9:15 am ■ Bob Evans Memorial Auditorium (145 and 155)
Prescription Drug Abuse: A Call to Action
Michael Botticelli, Deputy Director of the White House Office of National Drug Control Policy

9:15–9:20 am ■ Bob Evans Memorial Auditorium (145 and 155)
Introduction of Speaker
Laureen Smith, PhD, RN

9:20–10:15 am ■ Bob Evans Memorial Auditorium (145 and 155)
Mountains of Trouble
Sharon Denham, RN, DSN, Professor Emeritus, Ohio University, School of Nursing Project Director

9:25–10:25 am ■ International Room (110)
Recruitment and Retention in Community Based Research; Moderator: Madhurima Sarkar, PhD
Recruitment and Retention in Community Based Research — Jennifer Kue, PhD
Keys to Engaging Participants from Special Populations in our Research — Kim Arcoleo, PhD
Partnering with Families and Schools in Pediatric Research — Cindy Gerhardt, PhD
10:15-10:35 am  ■  A.B. Graham Hall 1st Floor
Break / ATRN Networking

10:25 - 10:40 am  ■  Innovation Room 5th Floor
Break / CCTS AM Poster Viewing

10:45 - 11:00 am  ■  Bob Evans Memorial Auditorium (145 and 155)
CCTS Update
Rebecca D. Jackson, MD

10:45 - 11:30 am  ■  Eastman Room (100)
Segment Community Based Research Programs; Moderator: Carson Reider, PhD
Community Based Environmental Health Research in Appalachian Ohio – Erin Haynes, DrPH
Community Based Prevention of Opioid Overdose Deaths – Erin Winstanley, PhD

10:45 - 11:30 am  ■  Multi-Media Room (220)
Tobacco, Prescription Drugs and Other Addictions Peer Reviewed; Moderator: Robert Rice, Jr, PhD
New Trends in Tobacco Product Use – Melissa Blank, PhD
A Framework for Intervention Dissemination in Appalachia: Barriers and Success – Geri Dino, PhD

11:00 - 12:00 pm  ■  Eastman Room (100)
The Commonwealth of Community Health: Powerful Partnerships for Health and Wellbeing
William N. Elwood, PhD; National Institutes of Health Office of Basic Behavioral and Social Sciences Research

11:40 – 12:00 pm  ■  A.B. Graham Hall 1st Floor
ARTN Break for lunch pick up

12:00 – 12:20 pm  ■  A.B. Graham Hall 1st Floor
CCTS Break for lunch pick up

12:00 – 12:05 pm  ■  Bob Evans Memorial Auditorium (145 and 155)
Introduction of Speaker
Tania Basta, PhD, MPH, CHES

12:05 - 1:00 pm  ■  Bob Evans Memorial Auditorium (145 and 155)
From Problem to Epidemic in a Decade: Prescription Drug Abuse Trends in Rural Appalachia
Jennifer Havens, PhD, MPH  Associate Professor of the Behavioral Science Department, University of Kentucky College of Medicine

12:20 - 1:05 pm  ■  Multi-Media Room (220)
Networking Lunch Session A; Moderator Usha Menon, PhD, RN, FAAN
Dissemination and Implementation in Community Settings

12:20 - 1:05 pm  ■  International Room (110)
Networking Lunch Session B; Moderator Sarah O’ Brien, MD, MSc
Translating Basic Research to Population Health Improvement

12:20 - 1:05 pm  ■  Eastman room
Networking Lunch Session C; Moderator Jennifer Kue, PhD
Data Ownership in Community Engaged Research

1:15 – 2:15 pm  ■  Bob Evans Memorial Auditorium (145 and 155)
Implementation of EBP and Fidelity, Moderator: Stuart Hobbs, MBA, PhD
Substance Abuse among Adults in the Ohio Appalachian Region – Ling Wang, MPH
Perceptions of Drug Abuse among Residents in Rural Eastern Appalachian Kentucky – Tania Basta, PhD, MPH, CHES

1:15 – 1:50 pm  ■  Multi-Media Room (220)
The Commonwealth of Community Health: Powerful Partnerships for Health and Wellbeing
William N. Elwood, PhD; National Institutes of Health Office of Basic Behavioral and Social Sciences Research

1:15 – 2:15 pm  ■  Eastman Room (100)
Tobacco, Prescription or Other Addictions Peer reviewed; Moderator: Beth Burkhard, MBA
Drug Use and Health Risks among Appalachian Women – Michelle Stanton Tindall, PhD
Secondhand Smoke Exposure and Neuromotor Performance in Appalachian Children – Samrat Yeramaneni, MBBS, MS

1:45 – 1:50 pm  ■  Multi-Media Room (220)
The Generation Rx Initiative and Partnerships for Prevention – Kenneth Hale, R.Ph, PhD

1:45 – 2:15 pm  ■  International Room (110)
Opportunities, Challenges and At-Risk Populations; Moderator: Lauren Phelps, MPA
Opportunities and Challenges of Conducting Oncology Research in Appalachia – Georgia Narsavage, PhD
The Generation Rx Initiative and Partnerships for Prevention – Kenneth Hale, R.Ph, PhD

1:50 - 2:00 pm  ■  Eastman Room (100)
ARTN Break

2:00 - 2:45 pm  ■  Eastman Room (100)
Round Table Collaboration
Tobacco

2:00 - 2:45 pm  ■  Multi-Media Room (220)
Round Table Collaboration
Prescription Drug Abuse

2:00 - 2:45 pm  ■  International Room (110)
Round Table Collaboration
Other Addictions

2:15 - 2:45 pm  ■  A.B. Graham Hall 1st Floor
CCTS Poster Awards
Rebecca D. Jackson, MD
SPEAKER BIOS

Kimberly Sidora-Arcoleo, PhD, MPH is associate professor and director of the Center for Women, Children & Youth in The Ohio State University College of Nursing and also an adjunct associate professor of Pediatrics at Nationwide Children’s Hospital. Dr. Arcoleo earned her bachelor’s degree in Biology from SUNY Buffalo, her master’s degree in Public Health and doctorate in Health Services Research from the University of Rochester School of Medicine & Dentistry. Dr. Arcoleo has extensive experience designing, implementing and managing large scale, longitudinal randomized intervention studies, cost-effectiveness analysis and complex statistical analyses spanning more than 25 years of research during her career.

Tania B. Basta, PhD, MPH, CHES, received a Masters of Public Health (MPH) in Community Health Education from Indiana University and a PhD in Health Promotion and Behavior from the University of Georgia. Currently, she is an associate professor in the Department of Social and Public Health in the College of Health Sciences and Professions at Ohio University and is also affiliated faculty in the Center for International Studies and the College of Communications. She is also the associate director of the Appalachian Rural Health Institute, an interdisciplnary health services and research institute, collaboratively run by the Colleges of Osteopathic Medicine and Health Sciences and Professions at Ohio University.

Melissa Blank, PhD, is an assistant professor of Psychology at West Virginia University. Her research aims to understand factors that promote and maintain drug use. Using human models of drug dependence, the majority of this work focuses on the area of nicotine/tobacco use. Her current research efforts cover: 1) Alternative tobacco products (ATPs): Cigarette smokers’ concurrent use of ATPs such as cigars, smokeless tobacco, and water pipes. 2) Potential reduced exposure products (PREPs): Use of PREPs marketed as a means to reduce the harms associated with tobacco smoking. 3) Genetics of smoking behavior: The influence of genetic polymorphisms, such as those involved in nicotine metabolism and regulation, on nicotine self-administration as measured via smokers’ topography.

Michael Botticelli was sworn in as deputy director of the White House Office of National Drug Control Policy in November 2012. Mr. Botticelli has more than two decades of experience supporting Americans who have been affected by substance use disorders. Prior to joining ONDCP, Mr. Botticelli served as director of the Bureau of Substance Abuse Services at the Massachusetts Department of Public Health, where he successfully expanded the innovative and nationally recognized prevention, intervention, treatment, and recovery services for the Commonwealth of Massachusetts. He also forged strong partnerships with federal, state and local law enforcement agencies, state and local health and human service agencies and stakeholder groups to guide and implement evidence-based programs. These programs include the establishment of a treatment system for adolescents, early intervention and treatment programs in primary healthcare settings, jail diversion programs, re-entry services for those leaving state and county correctional facilities, and overdose prevention programs. Born in upstate New York, Mr. Botticelli holds a bachelor’s degree from Siena College and a master’s degree from St. Lawrence University. He is also in long-term recovery from addiction, celebrating more than 24 years of sobriety.
Jennifer Cabe, MA, leads strategic and operations functions as executive director and a member of the board of Canyon Ranch Institute, a 501(c)3 non-profit organization that catalyzes the possibility of optimal health for all people. Jennifer also serves as an instructor for The Ohio State University College of Nursing. Jennifer earned a bachelor's degree at Trinity University in San Antonio, Texas, and a master's degree in public communication at American University in Washington, D.C.

Angela Cornelius Dawson, MS, LPC, MRC, currently serves as the executive director of the Ohio Commission on Minority Health. The commission was created to address the disparity in health status between majority and minority populations. The Ohio Commission on Minority Health was the nation's first state office of minority health in response to the disparity in health status between Ohio's minority and non-minority populations. Prior to this selection, Ohio Governor Ted Strickland appointed Dawson as the director of the Ohio Department of Alcohol and Drug Addiction Services in 2007. She served as the first African-American director from 2007-2011. Prior to her appointment to ODADAS, Dawson served as the executive director of Project Linden, Inc., a private non-profit outpatient alcohol and other drug treatment and prevention services center in Franklin County for twenty years. Dawson received a bachelor's degree in rehabilitation education, a master's degree in counseling and guidance and a bachelor's degree in rehabilitation education, a master's degree in counseling and guidance and a bachelor's degree from Wright State University.

Geri Dino, PhD, is a professor at West Virginia University in the Department of Social and Behavioral Sciences, School of Public Health and the Department of Clinical and Translational Science, School of Medicine. She is the principal investigator/director of the West Virginia Prevention Research Center and director of the Community Engagement Program for the West Virginia Clinical and Translational Science Institute. She uses community-based participatory research methods to reduce chronic disease behavioral risk factors, particularly with teen tobacco use and with underserved, rural populations. Dr. Dino has more than 15 years of continuous external research funding and has an internationally recognized program of research and publication in adolescent smoking. She co-developed the "Not On Tobacco" (N-O-T) teen smoking cessation program. N-O-T was formally adopted by the American Lung Association (ALA) in 1998, and was found to be the most commonly used packaged teen smoking cessation program in the U.S. and has received multiple federal designations as an evidence-based model program. The ALA estimates that N-O-T has reached more than 300,000 teen smokers since 2000, with about one in five reporting quitting at the end of the program.

William N. Elwood, PhD, is the facilitator and coordinator NIH's Basic Behavioral and Social Science Opportunity Network (OppNet), a trans-NIH initiative to increase extramural research funding on basic mechanisms of behavior and social processes. In October 2011, Dr. Elwood received an NIH Director's Honor Award for coordinating this initiative. Dr. Elwood also develops basic research agendas on influential processes of cultural attitudes, beliefs, and values on health and wellbeing. Concurrently, he serves as the behavioral social sciences expert for the agency's Clinical and Translational Science Awards community engagement network, the NIH Global Household Air Pollution Reduction Steering Committee, and NIH's health literacy initiatives. Before Dr. Elwood joined OBSSR, he was the scientific review officer for NIH's Community-Level Health Promotion study section. Prior to joining NIH, Dr. Elwood conducted community-based research throughout the U.S. and Mexico on drug-use epidemiology, public housing-based health initiatives, STD/HIV-intervention efficacy studies, substance abuse prevention and treatment reform programs. He also served as associate American editor of AIDS Care: Psychological and Socio-medical Aspects of AIDS/HIV. Elwood received his PhD from Purdue University. His scientific books and articles concentrated on the attitudes and beliefs of hard-to-reach populations and the influences that cultural and personal values and community settings have on mental health, health-related behaviors and participation in civic life. NIH, SAMHSA, WHO, and private foundations supported his research.

Amy Ferketich, PhD, has a master's degree in applied statistics and a doctoral degree in public health with a specialization in epidemiology. Currently, her research focuses on tobacco control and applied survey methodology. In tobacco control she has been involved with tobacco dependence treatment interventions targeting underserved smokers, as an evaluator at The Ohio State University Tobacco Prevention Research Center. Her research on tobacco marketing strategies in the Appalachian region of Ohio, an evaluation of clean indoor air policies in the Appalachian region of the U.S., and a smoking prevention program among Chinese American youth in New York City. Her work in survey research has also been diverse. Since 2007 Ferketich has been involved with the Ohio Family Health Survey, now known as the Ohio Medicaid Assessment Survey (OMAS), which is one of the largest household telephone surveys in the United States that is focused on state-level health insurance coverage and health issues. She is currently the PI of the academic research team that supports OMAS.

Ihuoma Eneli, MD, MS, is medical director of Nationwide Children's Hospital Center for Healthy Weight and Nutrition (CHWN), Columbus, Ohio. She is a board certified general pediatrician and associate professor of Pediatrics at The Ohio State University College of Medicine. In addition to her medical training, her background includes a master's degree in Epidemiology and a clinical research fellowship. In her role as the medical director, she oversees a pediatric obesity center with activities ranging from advocacy and prevention to medical and surgical interventions. Dr. Eneli also directs the Primary Care Obesity Network (PCON), which provides obesity-related training and resources for physician practices in central Ohio. As part of this project, she integrates clinicians, researchers, allied health professionals and IT to build a collaborative and sustainable initiative to tackle childhood obesity.
Dr. Kathleen Hale, RPh, PhD, is an assistant professor of Clinical Pharmacy Practice and the director of the Division of Ambulatory Care Pharmacy at The Ohio State University. Dr. Hale received her PharmD from the University of Vermont, and completed a fellowship in pediatric psychosocial oncology at Cincinnati Children's Hospital Medical Center. Her research focuses on risk and resilience factors associated with family adjustment to childhood chronic illnesses, such as cancer. This includes studies from diagnosis to long-term survivorship, as well as end of life and post-bereavement. A key component of Dr. Gerhardt's work is the involvement of community partners in her research, including families, schools, and medical professionals. Dr. Gerhardt has been published extensively in this area and has received multiple grants from the National Institutes of Health and the American Cancer Society to support her research.

Dr. Cynthia A. Gerhardt, PhD, is an associate professor of Pediatrics and Psychology at The Ohio State University, and a principal investigator in the Center for Biobehavioral Health at the Research Institute at Nationwide Children's Hospital. Dr. Gerhardt received her PhD from the University of Vermont, and completed a fellowship in pediatric psychosocial oncology at Cincinnati Children's Hospital Medical Center. Her research focuses on risk and resilience factors associated with family adjustment to childhood chronic illnesses, such as cancer. This includes studies from diagnosis to long-term survivorship, as well as end of life and post-bereavement. A key component of Dr. Gerhardt's work is the involvement of community partners in her research, including families, schools, and medical professionals. Dr. Gerhardt has been published extensively in this area and has received multiple grants from the National Institutes of Health and the American Cancer Society to support her research.

Dr. Jennifer Havens PhD, MPH, is an associate professor in the Behavioral Science Department at the University of Kentucky College of Medicine. Her primary appointment is within the Center on Drug and Alcohol Research, the mission of which is to explore substance abuse across multiple disciplines within the Commonwealth of Kentucky. Dr. Havens' primary research interest is the abuse of prescription drugs in rural Appalachia. More specifically, she explores the medical consequences of injection drug use, such as hepatitis C and HIV. To that end, Dr. Havens has received two federal research grants to study prescription drug abuse in rural Eastern Kentucky. The study team has been following more than 500 prescription drug abusers since 2008 and continues to track and interview participants in the cohort. Dr. Havens has published more than 25 manuscripts on prescription drug abuse in rural Appalachia. She did both her MPH and PhD training at the Johns Hopkins Bloomberg School of Public Health.

Dr. Ghana Narsavage, PhD, ANP-BC, FAAN, FNAP, is a Professor of Nursing and Director of the Office for Interprofessional Education at the Robert C. Byrd Health Sciences Center at West Virginia University. In 2008 she was named the first Faculty Fellow in Engaged Scholarship at Ohio University, through which she led a faculty development initiative in community-based participatory research. Dr. Hamel-Lambert's investment is community-university partnerships inspired the development of Integrating Professionals for Appalachian Children (IPAC), a rural health network to improve access and quality of health, mental health and allied health services in southeastern Ohio. Over the past six years, programs have been funded by HRSA's Office of Rural Health Policy, the Ohio Department of Health & SAMHSA, and the Governor's Office of Health Transformation. Dr. Hamel-Lambert earned a doctorate in Clinical Psychology in 1990 from Ohio University and a master's degree from Case Western Reserve University in 2001.
chronic diseases including COPD, coronary heart disease in women, and cystic fibrosis using home healthcare and rehabilitation. She is currently funded by the NIH National Cancer Institute for a pilot study of telemonitoring to prevent rehospitalization for patients with lung cancer.

Andrew Pleasant, PhD, is senior director of Research at Canyon Ranch Institute and senior instructor at The Ohio State University College of Nursing. Pleasant is responsible for advancing the role of health literacy across Canyon Ranch Institute activities. He also leads all research and evaluation activities at Canyon Ranch Institute, a 501(c)3 non-profit organization that catalyzes the possibility of optimal health for all people. Pleasant also serves as a senior instructor for The Ohio State University College of Nursing. Pleasant has led and participated in hundreds of presentations and trainings in the U.S. and around the world, primarily on the topics of health literacy, science, risk and environmental communication. He is co-author of the book Advancing Health Literacy: A Framework for Understanding and Action.

Eric Seiber, PhD, is assistant professor at the College of Public Health-Health Services Management and Policy. He earned a doctorate in Economics at Tulane University and a bachelor’s degree in Physics and International Studies from Eckerd College. His research focuses on health care financing for vulnerable populations. His current work examines both public and private insurance markets, Medicaid managed care and Medicaid enrollment. Dr. Seiber has published his work in multiple journals, including Health Affairs, Health Services Research, the Journal of Health Politics, Policy, and Law, and Social Science and Medicine. His research sponsors and collaborators include the U.S. Department of Labor, the U.S. Small Business Administration, the World Health Organization, the U.S. Agency for International Development, Medicaid agencies in Ohio and South Carolina and governments and NGOs in Latin America.

Laureen H. Smith, PhD, RN, is an associate professor at The Ohio State University College of Nursing. She was born and raised in Appalachian Ohio. Being the first in her family to attend and graduate college, Dr. Smith earned her bachelor’s degree in Nursing from Ohio State’s College of Nursing. She has actively worked in numerous nursing positions including orthopaedics, occupational health, home health care, school nursing, nursing administration and program development. She earned her master’s degree in Community Health Nursing and her doctorate in Nursing from the University of Michigan-Ann Arbor. Her specialty area is health promotion and risk reduction nursing. Since returning to Ohio, Dr. Smith has focused her research efforts on the health, health care access and health care utilization of children in Appalachia. She has conducted obesity prevention and lifestyle improvement intervention studies targeting school aged children in Appalachia. She has been published in several peer-reviewed nursing and interdisciplinary journals and serves as an Editorial Board member for the Journal for Specialists in Pediatric Nursing.

Michele Staton-Tindall, PhD, is an Associate Professor in the College of Social Work at the University of Kentucky and a Faculty Associate of the UK Center on Drug and Alcohol Research. She has extensive experience in substance abuse research and in HIV-related research. Much of her work has focused on substance use among prisoners and parolees. She was recently awarded a NIH/NIDA grant to study the effectiveness of a Motivational Interviewing approach to HIV and Hepatitis C interventions with rural women who are incarcerated. She is also the PI for a statewide treatment outcome study of individuals who have been in prison-based therapeutic community recovery programs. She teaches research methods in the College of Social Work.

Lorraine Wallace, PhD, is associate professor and director of Research in the Department of Family Medicine at The Ohio State University. She received her undergraduate degree from Rutgers University, where she was a four-year letter winner on the Lady Knights varsity golf team. She received her doctorate from Ohio State. Her research and teaching interests focus on health literacy, patient-physician communication, access to medical care and health-related disparities. Dr. Wallace is an active researcher, having authored nearly 100 peer-reviewed publications, monographs and editorials. She is currently deputy and associate editor of BMC Family Practice. She was a Fulbright Scholar in the Republic of Moldova and Cyprus in 2009-2010.

Mary Ellen Wewers, RN, PhD, MPH, is a professor in the Division of Health Behavior and Health Promotion and director of faculty development at The Ohio State University College of Public Health. She received a doctorate in nursing from the University of Maryland and was trained as a nurse practitioner in primary care. She has a master’s degree in public health from Harvard University. Dr. Wewers has been NIH-funded to conduct tobacco-related research since 1988. This work has focused primarily on underserved smokers. She served as a member of all three U.S. Public Health Service Expert Panels that developed the Clinical Practice Guideline entitled Treating Tobacco Use and Dependence. She is the co-director and co-investigator on a NCI P50 award entitled “Center for Population Health and Health Disparities: Reducing Cervical Cancer.” Her work on this initiative included the investigation of tobacco use and cessation among women at risk for cervical disease. She has also been funded by NCI to investigate smokeless tobacco marketing approaches among Ohio Appalachians. In addition, she currently is conducting a randomized clinical trial of tobacco dependence treatment with adult Appalachian residents who smoke. Dr. Wewers served as past chair of the NIH Community-Level Health Promotion Study Section and in 2006, was named a fellow in the American Association for the Advancement of Science (AAAS).

Erin L. Winstanley, PhD, received her doctoral degree from The Johns Hopkins Bloomberg School of Public Health and has over 17 years experience as a behavioral health services researcher. Dr. Winstanley is an Assistant Professor at the University Of Cincinnati College Of Medicine and the Director of Services Research & Dissemination for the Ohio Valley Node of the National Institute on Drug Abuse’s Clinical Trials Network. Dr. Winstanley has advanced training in biostatistics and experience managing complex data sets (including the use of RedCAP), as well as experience analyzing data from longitudinal randomized clinical trials. Dr. Winstanley has co-authored 14 journal articles, co-authored 3 book chapters and made numerous scientific presentations.
Appalachian Rural Health Institute at Ohio University and The Ohio State University Center for Clinical Translational Science is Co-Sponsor of the ATRN Health Summit.

The ATRN Planning Committee is comprised of:

Tania Basta, PhD, MPH, CHES
Associate Professor, Department of Social and Public Health, and Associate Director of the Appalachian Rural Health Institute, Ohio University

Jane Hamel-Lambert, MBA, PhD
Associate Professor of Family Medicine, and the Director of the Appalachian Rural Health Institute, Ohio University

Brady A. Reynolds, PhD
College of Medicine’s Department of Behavioral Science, University of Kentucky

Laureen Smith, PhD, RN
Associate Professor College of Nursing, The Ohio State University

Beverly Stringer
Community Engagement Coordinator, The Ohio State University Center for Clinical and Translational Science

The OSU CCTS planning committee is comprised of:

Deena Chisolm, PhD
Pediatric Expert, Nationwide Children’s Hospital

Usha Menon, PhD, RN, FAAN
Professor and Vice Dean College of Nursing, The Ohio State University

Tonya Montgomery
Event Planner, The Ohio State University Center for Clinical and Translational Science

Madhu Sarkar, PhD,
Research Programs Manager, College of Nursing, The Ohio State University

Kim Toussant, MBOE, MA, CRA
Lean Six Sigma Black Belt Administrative Director, The Ohio State University Center for Clinical and Translational Science
