The Ohio State University is one of the world’s largest research institutions working to advance clinical and translational research. It is home to more health sciences colleges located in close proximity to one another than any other university in the United States (Dentistry, Medicine, Nursing, Optometry, Pharmacy, Public Health, Veterinary Medicine), as well as non-health sciences colleges Engineering, Social Work, Food, Agriculture and Environmental Sciences, and others.

In addition to access to the breadth of multidisciplinary team members for collaboration, its success in obtaining financial support from industry and government has promoted the construction of extensive laboratory and clinical infrastructure which optimizes opportunities for the translation of research to prevention, treatment and other health care strategies.

The Ohio State University Wexner Medical Center is one of the largest and most diverse academic medical centers in the country, and is dedicated to improving people’s lives by applying innovations in research, education, and patient care. As a national leader in personalized medicine, Ohio State’s Wexner Medical Center is revolutionizing medicine and...
catalyzing the transformation of healthcare delivery to provide more precise, cost-effective, and higher quality health care for patients.

Our pediatric hospital partner, Nationwide Children’s Hospital, is one of the largest pediatric physician hospital organizations in the country with a strong infrastructure for research, integration of clinical and research programs, and focused investment toward multidisciplinary programs providing clinicians and researchers the opportunity to create the highest possible impact on the health of children, both in the present and future.

Ohio State’s Center for Clinical and Translational Science (CCTS) is a member of the Clinical and Translational Science Award (CTSA) Consortium within the National Center for Advancing Translational Sciences at the National Institutes of Health (NIH). The CCTS is committed to strengthening relations within the translational community at Ohio State as well as colleagues at other CTSA institutions and research networks, the NIH and industry collaborators, and community partners such as those in the Appalachian Research Translational Network to achieve the mission of advancing translational sciences.
