LATEST NEWS AT THE CCTS

Second Annual CCTS Scientific Meeting a Success

The Second Annual CCTS Scientific Meeting, focused on Translational Therapeutics, was a success! We are thankful for the many researchers and investigators that came out to our event.

If you missed it, the CCTS website and YouTube channel has posted videos of most of the lectures and a brief summary of the event for your review.

CCTS Awarded a BRAVO! Values in Action Team Award from Medical Center

The Center for Clinical and Translational Science received recognition by being presented with a BRAVO! Values in Action Team Award by the OSU Medical Center last month.

Values in Action, which recognizes both individuals and teams, honors those who espouse Ohio State values, whether it be leadership, relationship building, or the daily things that are done to make a difference for people.

Video Addressing Community’s Perspective on Research is on YouTube

The Prevention Research Center Community Partnerships Committee has developed a video to convey issues that community members would like researchers to consider when doing research in and with communities.

The video specifically addresses building trust, communicating with sensitivity, considering community members’ situations/perspectives, IRB protections, sharing research results, and the benefits of research.

For more information, contact PRC Program Manager Carol Smathers, 614-292-8181. Watch “Community Perspectives on Research” on YouTube.

Payne Named to Business First "Forty Under 40"

Philip Payne, PhD, Chair of the Department of Biomedical Informatics at The Ohio State University Medical Center and CCTS Biomedical Informatics Program Director, has been selected by Columbus Business First in their annual "Forty Under 40" list. Selected honorees were scored based on professional development, awards and recognition, and community involvement.

To view the entire list, visit their web page.

2011 Personalized Health Care National Conference

The 2011 Personalized Health Care National Conference, “The Future of P4 Medicine and Its Impact on Clinical Care”, will be held October 6-7, 2011 at the Blackwell Inn at The Ohio State University. This conference is sponsored by The Ohio State University Clinical and Translational Science, The Ohio State University Center for Personalized Health Care, and The Ohio State University Comprehensive Cancer Center – Arthur G. James Cancer Hospital and Richard J. Solove Research Institute.

The Future of P4 Medicine and Its Impact on Clinical Care focuses on the infrastructure enabling P4 Medicine, applications of genetics and genomics in clinical medicine, the latest breakthroughs in science, patient engagement and the challenges of making personalized health care and P4 Medicine a reality. For additional information, please visit http://www.ced.osu.edu/PersonalizedHealthCare/index.html.

Davis/Bremer Awards Announced

The CCTS is pleased to announce the most recent recipients of the Richard P. and Marie R. Bremer Medical Research Fund and William H. Davis Endowment for Basic Medical Research awards.

These programs, intended for early stage investigators, strive to develop outstanding physician scientists at Ohio State by supplying research funds for their innovative research projects.

The OSU CCTS has awarded Tonya Orchard, PhD, RD, LD, with a TL1 award for her research involving the relationship between the consumption of certain fatty acids and the instances of hip fractures in post-menopausal women.

Orchard, who just completed her PhD, has been involved in the healthcare field for many years as a clinical dietician. Her preliminary doctoral project examined dietary consumption of fatty acids and how they were related to fracture risk using self-reported data from the Women’s Health Initiative.

Read more about Dr. Orchard's TL1 research project

The Clinical Research Center (CRC) is an exciting catalyst for exploring the frontiers of human research. With nursing, bionutrition, biostatistics, informatics and laboratory support, we provide OSU investigators with the necessary and cutting-edge tools to explore the pathophysiology and treatment of disease. You will find that the faculty and staff at OSU are leaders in many critically important areas of clinical investigation.

The CCTS team leverages the skills and tools that exist within OSU’s CRC in order to accelerate the progress of clinical and translational science. Request services from the CCTS.
