

SITE MARKETING LETTER TEMPLATE

HELLO _____

I am currently looking for new exciting clinical trials for our highly experienced research team. Our site can conduct studies in all areas of Cardiology. Our coordinators are experienced Critical Care Nurses who have performed difficult Phase II PK studies, Phase III-IV studies, Acute MI studies, Unstable Angina Studies, Congestive Heart Failure Studies, Lipid Lowering Studies, Primary Prevention Studies, Hypertension Studies, and Device Studies to name a few. Three of our coordinators have CCRC certification.

We work for the University of Louisville Division of Cardiology. Research interests for the group include primary prevention, hypertension, congestive heart failure, diabetes, interventional studies, acute MI, unstable/stable angina, preconditioning, and cardiac surgery studies.

Our recruitment base includes four hospitals (two private, a University, and a VAMC) and three cardiology clinics. We collaborate with a large internal medicine practice and a successful Cardiovascular Surgical Team to provide their patients access to clinical trials.

Please contact me if you have any studies that would be a good fit for our site. Thank you for your time and consideration.

Sincerely,

Name
