

SDA Series:

**National Institute of Diabetes and Digestive and Kidney Diseases
(NIDDK) Central Repository**

July 15, 2021

12:00 – 1:00 pm

The NIDDK Central Repository collects and simplifies access to samples and corresponding clinical and outcome data from designated NIDDK funded studies. This mechanism allows for additional studies to be conducted which in turn enhances the value of the original research. The purpose of this seminar is to introduce investigators to the NIDDK Central Repository and provide an overview of how to access data and samples.

Speaker: Kellie Archer, PhD

Kellie Archer is Professor and Chair of the Division of Biostatistics in the College of Public Health and a member of the CCTS Biostatistics, Epidemiology, and Research Design (BERD) core. She has served on several NIDDK special emphasis panels to review BioSpecimen Requests (X01 grant applications) for accessing samples and corresponding data from the NIDDK Central Repository.
